Message
from Special Assistant to
Hon'ble Chief Adviser
Ministry of Post, Telecommunication and IT

I am delighted to know that International Security Expo (ISE) 2025 co-located with International Occupational Safety. Health and Fire Expo (IOSHFE) 2025 is set to take place on 18-20 Sept 2025 at International Convention City Bashundhara (ICCB), Dhaka, organized by Bangladesh Computer Samity, I-Station Limited and GPE Expo (FZE). On this occasion I extend my heartfelt greetings and congratulations to the organizers, domestic & international participants and everyone related to this event.

This expo will serve as a dynamic platform where local and international exhibitors will unveil their most advanced security technologies to an engaged audience of industry professionals, policymakers, consumers, and importers. More importantly, it will catalyze a new era of integrated security consciousness, empowering stakeholders across all sectors with the knowledge and tools essential for navigating today's complex threat landscape.

Our ministry has undertaken comprehensive cyber security initiatives over the past year, including nationwide awareness campaigns, specialized training programs, and robust digital safety frameworks specifically designed to integrate with occupational safety standards. We understand that modern security challenges require a unified approach where cyber resilience and workplace safety operate as one cohesive system. The urgent need of our time is to establish a common platform for knowledge sharing—a collaborative ecosystem where private and public organizations, civil defense/law enforcement agencies can unite to manage emerging security challenges effectively. This expo provides the perfect foundation for such a platform, fostering strategic partnerships between technology innovators, safety professionals, and security agencies. This expo embodies that collective spirit of innovation and collaboration, serving as a beacon for groundbreaking partnerships and the exchange of pioneering solutions that will fortify not only our homeland's physical security infrastructure. We must unite with unwavering determination to safeguard our nation's future. This expo embodies that collective spirit, serving as a beacon for innovative collaboration, groundbreaking partnerships, and the exchange of pioneering solutions that will fortify our homeland's security infrastructure.

May the 'International Security Expo (ISE) 2025' achieve unprecedented success and inspire a new chapter of security excellence in Bangladesh!

Faiz Ahmad Taiyeb
Special Assistant to Hon'ble Chief Adviser
Ministry of Post, Telecommunication and IT
Government of the Peoples Republic of Bangladesh

Message
from the
Secretary
ICT Division

I am delighted to learn that the International Security Expo (ISE) 2025 and the International Occupational Safety, Health and Fire Expo (IOSHFE) 2025 will be held from 18 to 20 September 2025 at the International Convention City Bashundhara (ICCB), Dhaka. I extend my sincere congratulations to the organizers, Bangladesh Computer Samity, I-Station Limited, and GPE Expo (FZE), as well as to all participants from home and abroad.

This event will provide a befitting platform for local and international exhibitors to showcase modern security and safety technologies. It will also benefit visitors, buyers and industry stakeholders by exposing them to innovative solutions that enhance both public and private sector readiness. Such initiatives will help raise awareness, encourage collaboration and create new opportunities for growth in our security and safety industries.

As Bangladesh advances toward becoming a safer and smarter nation, events like these highlight the importance of innovation, partnership, and resilience in strengthening our national security framework. I firmly believe that this expo will contribute to building a safer and more secure future for all.

I wish the International Security Expo (ISE) 2025 every success and hope it sets new standards of excellence in promoting security and safety.

Shish Haider Chowdhury, ndc
Secretary
ICT Division
Government of the People's Republic of Bangladesh
ICT Tower, Agargaon, Dhaka

Message
from the
Managing Director
Hi-Tech Park Authority

I am pleased to learn that the International Security Expo (ISE) 2025, in conjunction with the International Occupational Safety Health and Fire Expo (IOSHFE) 2025, will be held from 18-20 September 2025 at the International Convention City Bashundhara (ICCB). Dhaka. This significant event, organized by Bangladesh Computer Samity 1-Station Limited and GPE Expo (FZE), represents a milestone in the journey of Bangladesh toward enhanced security and safety standards.

This remarkable initiative reflects Bangladesh's growing commitment to global standards in security and safety. In the face of evolving technological challenges, this exposition will serve as a vital platform to introduce advanced solutions, exchange expertise, and foster international cooperation. I believe this expo significantly contribute to enhancing our national and global security outlook.

The timing of this exposition is particularly significant as our nation continues to build a secure and prosperous future. The expo will contribute to raising awareness about modern security challenges and available solutions, ultimately strengthening our collective security posture. I am confident that this platform will enable meaningful exchanges between technology providers, security professionals and decision-makers.

I convey my warmest wishes for the resounding success of this important event.

A.K.M. Amirul Islam ndc
Managing Director
Bangladesh Hi-Tech Park Authority

Message
of
BCS President

It gives me immense pleasure to know that Bangladesh is hosting the International Security Expo (ISE) 2025 alongside the International Occupational Safety, Health and Fire Expo (IOSHFE) 2025 from 18-20 September 2025 at ICCB, Dhaka. I commend Bangladesh Computer Samity, I-Station Limited and GPE Expo (FZE) for their initiative in bringing this important event to our country.

The security and safety sector plays a fundamental role in ensuring sustainable development and protecting our citizens, infrastructure, and economic interests. This expo will provide an excellent opportunity for stakeholders to explore the latest innovations, understand emerging trends, and build strategic partnerships that will enhance our national security capabilities.

I am particularly optimistic about the potential this event holds for promoting indigenous security solutions while facilitating access to international best practices and technologies. The expo will serve as a catalyst for capacity building, knowledge sharing, and professional development within our security and safety community.

As we work together to build a resilient and secure Bangladesh, events like ISE 2025 become instrumental in creating awareness, fostering innovation, and establishing the networks necessary for a robust security ecosystem. I believe this expo will contribute significantly to strengthening our security infrastructure and preparedness.

I wish the organizers, exhibitors, and all participants a highly successful and productive 'International Security Expo (ISE) 2025'!

Mr. Mohammad Zahirul Islam
President
Bangladesh Computer Samity (BCS)

In the occasion of International Occupational Safety, Health & Fire Expo & Conference 2025, 18–20 September 2025 | International Convention City Bashundhara (ICCB),

Dhaka, Bangladesh

Message from OSHE foundation

It is my great pleasure to welcome all participants, partners, and visitors to the International Occupational Safety, Health & Fire Expo & Conference 2025. This important event provides a unique platform for sharing knowledge, showcasing innovations, and promoting best practices in workplace safety, health, and fire risk management.

As Bangladesh continues to strengthen its commitment to decent work and sustainable industrial growth, ensuring safer and healthier workplaces has never been more critical. This conference and expo bring together government agencies, employers, workers, researchers, and solution providers under one roof to collaborate on advancing Occupational Safety and Health (OSH) standards and fostering a culture of prevention.

OSHE Foundation is happy to support this initiative as a partner organization.

We believe that multi-stakeholder engagement and knowledge sharing are essential to building resilient and safe workplaces. Together, we can work toward achieving the Sustainable Development Goals (SDGs) and a future where every worker returns home safe and healthy.

I thank all organizers, exhibitors, and participants for their commitment and contributions to this year's event. I encourage all of you to actively engage in the different discussion sessions/ side events organise at this conference, visit the stalls, and take-home actionable insights that will strengthen the defiance of OSH rights at work for all at workplaces, preventive OSH culture, good OSH governance and practices in your respective sectors.

Let us use this opportunity to inspire change, foster collaboration, and make a lasting impact on workplace safety and health in Bangladesh

A.R. Chowdhury Repon
Executive Director
OSHE foundation

Message
from the
Managing Director
I-Station Ltd.

It is with great pleasure that we welcome you to the **International Security Expo (ISE) 2025**, co-located with the **International Occupational Safety, Health & Fire Expo (IOSHFE) 2025**. These premier events are dedicated to driving innovation, collaboration, and awareness in the fields of security, workplace safety, and emergency response.

In today's world of rapid technological change and emerging challenges, safeguarding people, assets, and information has never been more critical. This joint platform brings together leading manufacturers, solution providers, policymakers, and industry experts to showcase advanced technologies, exchange insights, and foster meaningful partnerships.

As Bangladesh continues its remarkable journey of industrial growth, infrastructure development, and urban expansion, the need for comprehensive safety and security solutions is more vital than ever. Through these expos, we aim to connect global innovation with local implementation—empowering businesses, government bodies, and professionals to access future-ready solutions.

We extend our sincere gratitude to our exhibitors, partners, sponsors, and visitors for their invaluable participation and support. Your engagement strengthens the impact of these events and contributes to building a safer, more resilient Bangladesh.

We wish you an inspiring and rewarding experience filled with productive discussions, impactful demonstrations, and long-lasting collaborations.

Madhu Sudan Saha
Managing Director
I-Station Limited

Message
from the
Founder and CEO
GPE Expo (FZE)

IIt is our great honor to welcome you to the International Security Expo 2025 and the Occupational Safety, Health & Fire Expo 2025 — two dynamic platforms united under one roof to showcase the latest innovations shaping the future of global security and workplace safety.

In today's fast-changing world, integrated security and strong occupational health and safety systems are more critical than ever. This year's event brings together leading manufacturers, government agencies, thought leaders, industry professionals, and technology providers from across the globe to exchange ideas, share best practices, and address pressing challenges across both sectors.

From advanced surveillance, cybersecurity, and access control solutions to the latest in PPE, fire protection, and workplace safety technologies — this expo represents the full spectrum of safety and security excellence.

Our mission is to foster collaboration, spark dialogue, and encourage sustainable strategies that build safer workplaces, public spaces, and high-risk environments.

We sincerely thank our partners, sponsors, exhibitors, and participants for their unwavering support. Your presence underscores the vital role of safety and security in shaping a resilient future.

We encourage you to take full advantage of the networking opportunities, live demonstrations, expert-led sessions, and product showcases. May this expo not only serve as a hub of business but also as a platform for knowledge-sharing and future-building.

Welcome — let us work together to secure a safer tomorrow.

Industry Knowledge Sharing from

Mujtaba Sattar Anonto

47th Person on This Earth To Achieve
IBM Quantum Computing Certification
www.linkedin.com/in/anonto/

To Veritably Plant Smart Bangladesh We must Embrace Quantum Computing (QC)

What is Quantum Computing (QC)

Quantum Computing (QC) utilizes three magical quantum mechanics properties superposition, entanglement, and interference to exponentially speed up problem-solving compared to classical computers. While not replacing classical computers entirely, QC offers immense computational power, solving tasks in seconds that would take classical supercomputers billions of years.

Why Quantum Computing (QC) is So Powerful

Quantum Computing (QC) harnesses three fundamental quantum mechanics properties superposition, entanglement, and interference – to revolutionize problem-solving. Unlike classical computers, which face limitations in tackling optimization problems and simulating complex molecular structures, QC explores multiple states simultaneously through superposition. Entanglement, famously described by Einstein as "spooky action at a distance," enables instantaneous communication between entangled particles, defying traditional concepts of information transmission. Moreover, QC employs interference to amplify correct solutions while canceling out incorrect ones, leading to vastly superior computational capabilities. This transformative approach promises to solve challenges that classical computers struggle with, necessitating a fundamental shift in computational thinking.

Smart Bangladesh & Quantum Computing

In the journey towards establishing a Smart Bangladesh, it's paramount to acknowledge the shifting cybersecurity landscape, exemplified by incidents like the Bangladesh Bank Cyber Robbery in 2016. With Quantum Computing (QC) on the horizon, traditional security measures face obsolescence, given QC's potential to crack encryption methods like RSA through algorithms such as Shor's Algorithm. While current qubit limitations pose practical challenges, the rapid progress in QC technology underscores the necessity for quantum-proof security systems to protect sensitive data in the future. This imperative is echoed globally through significant investments in quantum technology sectors, as seen in Europe, Japan, the Middle East, India, and most recently, Bangladesh.

Quantum computing offers transformative possibilities in chemistry, economics, medicine, biology, and fundamental physics, presenting solutions to complex challenges across diverse industries. The convergence of quantum computing with the semiconductor industry further emphasizes the urgency for Bangladesh to embrace this technological shift fully.

Education plays a pivotal role in preparing Bangladesh for the quantum era. Initiatives like Q-12 in the USA highlight the importance of cultivating quantum skills among students to foster future innovation and maintain competitiveness globally. Furthermore, the emergence of quantum machine learning and AI presents new avenues for analyzing vast datasets, developing sophisticated algorithms, and tackling optimization problems with unprecedented speed. By embracing these advancements and nurturing a quantum-ready workforce, Bangladesh can realize its vision of a Digital Bangladesh and assert its leadership in the quantum computing revolution.

Why Policy Makers in Bangladesh Need a Fundamental Understanding of Quantum Computing

Policymakers in Bangladesh must grasp the fundamentals of quantum computing to drive the nation forward, leveraging its potential for innovation and economic growth, and positioning Bangladesh as a leader in the quantum revolution. Quantum computing offers opportunities for accelerating economic growth, addressing societal challenges, and navigating the global competitive landscape effectively. Understanding quantum computing enables policymakers to identify opportunities across various sectors and address potential risks like cybersecurity threats. Investing in research and development, fostering a skilled workforce, and forging strategic partnerships are essential for Bangladesh to capitalize on quantum technology's potential and stay at the forefront of innovation.

Also The policy makers must turn their Attention to the Quantum Ready workforce which is very much possible, I myself am the 47th Person on this earth to achieve the Certificate as "IBM Certified Associate Developer - Quantum Computation using Qiskit v0.2X" (& mind you this is the only Certification on this planet to evaluate someone Quantum Skills & most Prestigious Certification in this Realm) & I can Turn anyone who has a 12th Grade STEM Knowledge (& has a Good Basic/ clear conception in Math) into a Certificate Holder like me. For an Example of the USA for 12th Grade Students Quantum Computing Learning initiative (https://q12education.org/): Launched by the White House Office of Science and Technology Policy and the National Science Foundation, Q-12 is a consortium that will expand access to K-12 quantum learning tools and inspire the next generation of quantum leaders.

Smart Bangladesh Quantum Computing Innovation, Research & Workforce Center (SBQIRC)

We are currently in the process of drafting a proposal for the World Bank regarding the establishment of the Smart Bangladesh Quantum Computing Innovation, Research & Workforce Center (SBQIRC). Once the document is finalized, we will ensure to share it with you for your review and input.

Thank you for your interest and collaboration in this important initiative.

NETGEAR® AV

We are proudly committed to delivering the best-in-class connected network solutions for the Commercial, Residential, and Broadcast markets. The NETGEAR experience starts with a diverse range of products featuring with the latest technological advancements designed meet even the most complex requirements.

M4250 Managed Switches
he AV Line of M4250 switches are built for G AV over IP installations and designed for clean integration with traditional ack-mounted AV equipment.

M4350 Managed Switches
AVLine M4350 Switches, AV over IP out of the box. Fast, easy GUI configuration for AV pros. Quiet operation for production environments.

M4500 Managed Switches
The M4500 switches provide the power needed with throughput up to 100G. For AV over IP, they are configured to work out of the box.

ADVANCED WiFi FOR ADVANCED BUSINESS

WiFi 7 delivers multi-gigabit speeds and low interference ideal for high bandwidth use in business and education.

5x faster speeds than WiFi 6

2x maximum bandwidth, 320MHz high-capacity channels

Significantly lower latency, for real-time responsiveness

20% more data transmission, with 4096 QAM modulation

NETGEAR Insight offers centralized remote network management, giving full control to businesses and IT teams from one dashboard on any device.

Present Scenario of the Fire Protection Business in Bangladesh

The fire protection business in Bangladesh is in a state of growing demand and development, largely driven by the country's rapid industrialization, particularly in the ready-made garment (RMG) sector, and the rise of high-rise buildings. The sector is currently characterized by the following:

- **Increased Regulatory Scrutiny and Enforcement:** Following a series of tragic fire incidents, especially in the RMG industry (e.g., the Rana Plaza collapse), the government and international bodies have intensified their focus on fire safety. The Bangladesh National Building Code (BNBC) and other regulations are being more strictly enforced. This has led to a greater need for companies to comply with both national and international standards like NFPA (National Fire Protection Association), UL, and FM.

- **A Growing Market for Solutions:** As a result of the increased regulations and awareness, there is a rising demand for a wide range of fire safety solutions. This includes:

  - **Active Fire Protection Systems:** Fire hydrant and sprinkler systems, fire alarms, smoke detectors, and gas-based suppression systems.

  - **Passive Fire Protection:** Fire doors, fire-resistant materials, and fire compartmentalization.

  - **Consulting and Auditing:** Businesses are seeking professional services for fire risk assessments, fire safety plan preparation, and compliance audits to meet the requirements of regulatory bodies like the Fire Service and Civil Defence (FSCD).

- **Technological Advancement:** The market is seeing a shift towards more advanced fire detection and suppression technologies, moving beyond basic equipment to sophisticated systems. This is especially true for large-scale industrial and commercial projects.

- **Challenges and Gaps:** Despite the progress, challenges persist. Some buildings, particularly older ones, still lack adequate fire protection systems, and a "culture of impunity and negligence" regarding building codes is still an issue. There is also a lack of modern technology and a need for greater public-private partnership and community-based engagement to improve overall fire safety.

Future Prospects for the Fire Protection Business

The future of the fire protection business in Bangladesh appears promising and full of potential, fueled by several key factors:

- **Continued Industrial and Urban Growth:** Bangladesh's economic development, with expanding industrial zones, commercial hubs, and high-rise residential buildings, will continue to drive the demand for comprehensive fire safety solutions. As more businesses and infrastructure projects are developed, the need for fire protection systems, from design and installation to maintenance, will only increase.

- **Stricter Compliance and International Pressure:** The global focus on ethical and safe labor practices, particularly in the RMG sector, will ensure that fire safety remains a top priority. International buyers and organizations like the Accord and Alliance continue to push for and monitor compliance, which will create a sustained market for fire safety products and services.

- **Increased Public Awareness:** Growing awareness among the public, business owners, and government officials about the devastating consequences of fires will lead to greater investment in prevention and protection. This will not only impact large-scale industries but also commercial and residential sectors.

- **Opportunity for Local Manufacturing:** The high demand for fire safety equipment presents a significant opportunity for local manufacturing. Currently, much of the advanced equipment is imported, but there is a push to develop a domestic industry for fire safety equipment to reduce reliance on imports and create new jobs.

- **New Services and Training:** The market will likely see an increase in demand for specialized services beyond just equipment, such as:

  - Fire Safety Training and Drills

  - Maintenance and Servicing Contracts

  - Consultancy Services

  - Upgradation of Existing System

    - In conclusion, while the fire protection business in Bangladesh faces challenges related to compliance and a lack of resources, the present scenario indicates a strong and growing market. The future prospects are highly positive, driven by industrial growth, stringent regulatory oversight, and a greater emphasis on safety, making it a sector with significant investment potential.

Industry Knowledge Sharing from
Md Abdullah Al Fazlay Rabbi
Director & Partner
Zenith Safety Solution

Industrial safety is not just a compliance requirement It's the foundation of sustainable economic growth and human dignity

Today, Bangladesh stands out as one of the rising economic nations in South Asia. From garments to shipbuilding, from pharmaceuticals to power plants, our industries are shaping a future of innovation, employment, and global recognition. But with growth comes responsibility—the responsibility to protect the very people whose skill, dedication, and courage make this progress possible.

Industrial safety is not limited to a checklist or an audit. It is a culture an invisible shield that guards our workers, safeguards investments, and strengthens our nation's reputation. Whether it's a RMG factory, a high-risk construction site, a chemical processing plant, or a modern logistics hub—safety must be the first design, not the last thought.

However, challenges remain. Many factories still lack proper fire exits, ventilation, and protective equipment. In numerous construction sites and industries, proper safety gear is inconsistent, and safety remediation in some leading industries is slow. In an era of global supply chain scrutiny, these gaps are not just a domestic concern they directly affect our trade competitiveness and brand image.

We have seen the cost of neglect lives lost, livelihoods destroyed, and reputations damaged. But we've also seen the power of prevention factories without accidents, workers who return home safely, and businesses that win the trust of international partners because they put people first. Industrial safety is not an expense; it is an investment. A safe workplace boosts productivity and aligns with our commitments to the Sustainable Development Goals, particularly SDG 8 on decent work and economic growth. At Zenith Safety Solution, we believe that every helmet secured, every respiratory mask fitted, every pair of safety shoe laced, every glove worn, every goggle adjusted, every electrical safety suit donned, every gas detector activated, and every fire detection system installed is a step toward a stronger, safer Bangladesh. Our mission is to equip industries with world-class PPE gear, advanced detection systems, and expert training making safety not just a requirement, but a living, breathing culture in every workplace. Let us commit leaders, managers, and workers alike to a shared vision: A Bangladesh where safety is not an obligation, but a proud tradition. Together, we can build industries that are not only productive, but also humane. Because true progress is measured not just in profit, but in the lives, we protect along the way. Stay safe. Stay strong. Let's build the future.

Zicore Technologies
Idea . Innovation

ABOUT US

Since 2008, Zicore Technologies has been a trusted provider of electronic security and automation solutions across Bangladesh. We are dedicated to delivering reliable, innovative, and cost-effective security systems backed by premium after-sales service. Our mission is to make workplaces, institutions, and homes safer through the integration of advanced technology.

Over the years, we have built strong partnerships with leading global brands and earned the confidence of clients by consistently maintaining high standards of quality and support. At Zicore, we believe in combining technical expertise with customer-centric values to ensure long-term safety, security, and peace of mind for every client we serve.

Why Choose Us

- ▶ **15+ Years of Industry Experience**
- ▶ **Customised & Innovative Solutions**
- ▶ **Expertise in Central Monitoring System**
- ▶ **24/7 After Sales Service Trusted by Leading Corporates & Institutions**

Our Core Solutions

Video Surveillance System ◀
CCTV, CMS, VMS, Large scale video surveillance monitoring, AI Based Video Analytics

▶ Access Control & Attendance
Mobile NFC, Biometric, RFID, Password based

Intruder Alarm System ◀
Motion detection, real-time alerts, AI based Image Verification, Remote Monitoring

▶ Fire Detection & Alarm System
Smoke detection, Heat Detection. Water, Gas Leakage Detection

Structured LAN & Network Solutions ◀
LAN/WAN, WLAN, Data Storage (NAS/SAN)

▶ PA & Conference System
Digital communication, smart board integration

Idea to Innovation ◀
Turn your idea into reality — from prototype to full-scale commercial IoT product

Our Footprints

Installed 10,000+ CCTV Cameras nationwide
Deployed 800+ Access Control Devices
Implemented Structured LAN (6000+ Nodes)
Smart Classroom & Digital Conference Systems
Successful Projects at NSU, BUET, IUT, BU, DUET, CEDP
Grameen Phone, Santa Properties, Kallol Group, Singer etc.

INDSAFE

Enhancing Workplace Safety for a Safer Bangladesh

As one of the fastest growing economy in Asia, Bangladesh's Gross Domestic Product (GDP) is expected to surpass 500-billion-dollar mark by the end of this fiscal year. A major factor behind our GDP growth is the 70 million strong workforces providing cheap but efficient labor to the world. However, this cheap labor comes at a great cost. In order to keep the cost of production low, most businesses in Bangladesh tend to ignore workplace safety compliance. Following the tragic Rana Plaza tragedy in 2013, Bangladesh Government took a few actions including 2013 Labor Act Amendment. International initiatives as well as nationally led RMG Sustainability Council have been working diligently to improve workplace safety in the RMG sector. But when we look at other Industrial sectors in Bangladesh, the scenario looks very dismal.

Bangladesh is yet to have its own unique standard regarding PPE and Fire safety equipment. As a consequence, factory owners procure substandard safety equipment for their workers, resulting in workplace accident/injuries. Corruption is also a major factor which allows factory owners to bypass regulations regarding workplace safety. If you look at the construction sector alone, there are more than 100 workplace deaths occurring every year and rarely any one/party is held accountable. At this point, it is evident that occupational hazard cannot be reduced solely by relying on regulations.

What is necessary is a change in mindset. All industry stakeholders must view workplace safety compliance as a strategic investment rather than a cost. The financial returns of safety compliance (through reduced injury costs, improved productivity, enhanced employee morale, and a stronger company reputation) significantly outweigh the expenses of preventive measures. Safety PPE, often regarded as the last resort in the Hierarchy of Controls, are shields against much larger potential losses, such as medical bills, lost work time, legal fees, and decreased operational efficiency that occur when accidents happen. National Safety awareness programs must be led by Government nationally and must be diligently followed by every industry. Every worker must be made aware of their right to safe working environment, which must be protected by all of us as a community. In order to achieve the Sustainable Development Goal 8 (Decent Work and Economic Growth) set by the United Nations, Bangladesh needs all of its citizens to work together with a shared goal of building a safer Bangladesh.

The question is, are we ready to commit to a sustainable future?

IND SAFE
WHERE SAFETY MATTERS

Indsafe is a leading distributor of standardized industrial safety products. Formed in 2016, Indsafe markets and distributes a wide range of industrial PPE, Gas Detection and Fire Protection equipment which are carefully selected to meet industrial compliance standards. Indsafe is a subsidiary of GroupNautika, a group of companies offering a diverse range of technical services in the marine and industrial sector in Bangladesh.

Towards a Secure Future: ISE Bangladesh 2025 as a Gateway to Innovation

As we believe, "Allah is the ultimate protector, watching over His creation." Yet, it is our responsibility to take practical measures to safeguard what He has entrusted to us. Protecting property through preventive steps, regular upkeep, and investment in modern security systems is essential to reduce risks of theft, damage, and financial loss.

In a rapidly growing Bangladesh, enhanced security is more important than ever. Increasing crime rates, fast-paced urbanization, and the rise of digital connectivity all demand advanced, innovative solutions.

We are grateful to i-Station for arranging the International Security Expo (ISE) Bangladesh 2025. This prestigious platform will bring together manufacturers, solution providers, and end-users under one umbrella. It offers a unique opportunity to explore cutting-edge technologies, including artificial intelligence, shaping the future of security.

We look forward to learning, engaging, and collaborating through this event, as we work together to build a safer and stronger Bangladesh.

We invite all stakeholdersbusinesses, institutions, and individuals to join this transformative platform.

Zenith Safety Solution is a trusted name in providing world-class safety solutions provider across Bangladesh, representing leading international brands such as Honeywell, Dräger, Reliable Safety, and Karam. Our core expertise spans four major service areas: Personal Protective Equipment (PPE), Respiratory Protection, Fire & Gas Detection Systems, and Building Management Systems (BMS). We supply a complete range of PPE designed for durability, comfort, and maximum worker protection in industrial and high-risk environments. In respiratory protection, we deliver globally certified solutions that safeguard against hazardous airborne particles, gases, and vapors, ensuring compliance with international occupational health and safety standards. For fire and gas safety, we specialize in Honeywell and Drager brands' advanced fire detection and gas monitoring systems, offering accurate, reliable, and rapid response technologies that protect lives, assets, and critical infrastructure across industries such as oil & gas, power, manufacturing, and commercial facilities. Our Building Management Systems (BMS) integrate intelligent automation and control for HVAC, security, and energy efficiency, enabling organizations to reduce costs while enhancing operational performance. Backed by a team of skilled engineers, technicians, and service professionals, Zenith Safety Solution combines global technology with local expertise to deliver cost-effective, sustainable, and high-quality solutions, making us a trusted partner for safety, innovation, and long-term workplace excellence.

Company short profile / bio	:	

At Source BD International, we believe that true security is a product of knowledge, dedication, and a relentless commitment to quality. Our journey began with a clear vision: to move beyond simply selling products and instead become a trusted partner in building complete, reliable fire safety systems from the ground up. As a privately-owned construction company, we've had the freedom to focus on what truly matters—providing a seamless, end-to-end solution. We realized that for our clients to feel truly safe, they needed a partner who could manage every single detail. That's why we built a team of experts who collectively specialize in every stage of a project: from the initial engineering and design to fabrication, construction, and final commissioning. Our expertise isn't confined to a single product line. We've cultivated a robust global network that allows us to source the most advanced and reliable fire safety equipment on the market. This means we can provide a wide range of products and tailor a solution that perfectly fits your specific needs, rather than just offering a one-size-fits-all approach.Ultimately, our story is one of a commitment to compliance and excellence. We're not just building systems; we're building peace of mind. Every product we source, every solution we design, and every project we complete is driven by our unwavering dedication to protecting lives and property.

Web Address	:	www.authentixbd.com

Company short profile / bio   :

Authentix Brand & Securities BD is pioneering specialized brand protection service in Bangladesh. This startup of ours is focused on Sustainable Product Security Solutions in addition to professional AIT (anti illicit trade) operation services.

About Brand Protection
Business of established brands are suffering quite huge due to counterfeiting and IP infringement cases. Illicit trade syndicate are extremely active to exploit customers. In most of the cases brand managers are either ignorant about the effect of illicit trade for their product or reluctant in guarding the brands from wrong product. As example, there had been presence of twenty IP infringed products of one particular insecticide but company were not aware of the fact for many years. Systematic approach to eliminate the challenge can create sustainable solution and add grater value for the client and generate business.

Company Name	:	**Bangladesh Occupational Health, Safety and Environment Foundation (OSHE Foundation)**
Address	:	House-19, Lane-1, Block-A, Section-6, Mirpur-1216, Dhaka
Contact Person	:	A R Chowdhury Repon
Phone number	:	+880 1924-084659
E-mail address	:	repon.chowdhury@gmail.com
Web Address	: :	www.oshe-foundation.org

Company short profile / bio :

The Bangladesh Occupational Safety, Health and Environment Foundation (OSHE Foundation) was established in December 2003 through a workers' initiative. As a specialized non-profit development organization, OSHE is dedicated to addressing issues that impact employment, income, the environment, and the livelihoods of working people. Its mission is to promote safer, greener, and more equitable workplaces across Bangladesh.

OSHE Foundation serves as a key labor support institution, advocating for occupational health and safety (OHS), decent work, labor standards, and the creation of green jobs across both formal and informal sectors. The organization empowers workers by protecting their fundamental rights, amplifying their voices, and supporting those affected by occupational accidents and diseases. It also champions the involvement of national workers' organizations in achieving the targets set under the UN Sustainable Development Goals (SDGs).

OSHE Foundation has been instrumental in shaping national labor policies, including contributing to the National Occupational Health and Safety Policy (2013) and advocating for amendments to labor laws. As a national think tank, it addresses pressing issues related to labor rights, social protection, sustainable development, and cross-sectoral challenges.

It is an active member of several global networks, including ANROEV, AROSP, and A-BAN—demonstrating its ongoing commitment to improving labor rights and working conditions at both national and international levels.

Whether it's powering a mission-critical data center or enabling smarter collaboration, TRITON is committed to shaping the digital future with innovation and trust.

# Advantages of Business Directory Advertising

Highly Targeted

One advantage of Business Directory advertising is that each ad is highly targeted. Business Directory target people who are ready to buy. Business Directory have specific categories or headings where advertisers can advertise. A company can also advertise in multiple categories, if its business lends itself to more than one classification. For example, a fire extinguisher could be listed under "Fire Fighting Equipment" and "Fire & Life Safety Consultants."

Highly Effective

Business Directory advertising can also be highly effective. Advertisers often track their Business Directory advertising leads against what they spent to advertise in the book. Tracking the response elicited from a Business Directory ad is easy. Advertisers can set up a special line for the ad and count the responses, or ask callers where they learned about the business. Tracking services are available as well.

24-Hour Coverage

Business Directory are available for shoppers 24 hours per day; newspaper ads, for example, age and are discarded relatively quickly. The 24-hour availability can be particularly beneficial to the advertiser, when households use their Business Directory frequently. Most people store their Business Directory in drawers or cabinets near the phone so they can reference it when needed.

Company short profile / bio   :

Founded in 2002, has established itself as one of   Bangladesh's pioneering and most trusted ICT media platforms. Evolving from the renowned print magazine , the portal has been relentlessly dedicated to delivering cutting-edge technology news, analysis, and insights from both local and international sources. Over the years, C News has expanded its content and presentation to reflect the rapidly changing digital landscape, always striving to contribute to the sustainable growth of the ICT industry in Bangladesh.

Driven by the belief that the benefits of technology should reach everyone, CNewsVoice has made a strong impact even in remote areas, inspiring and educating grassroots communities about the transformative role of ICT in everyday life. Today, it stands as the first government-approved ICT-based online technology portal in the country.

With its wide readership and strong industry presence, CNewsVoice offers an excellent platform for companies to share their news, views, products, and services with a diverse audience. The portal regularly covers corporate events, product launches, and service updates, ensuring visibility among potential clients, partners, and the broader tech ecosystem.
